PRIME V2

Protocol for Review of Instructional Materials for ELLs V2

WIDA PRIME V2 CORRELATION
PRIME V2™

Introduction to PRIME

WIDA developed PRIME as a tool to assist publishers and educators in analyzing their materials for the presence of key components of the WIDA Standards Framework. PRIME stands for Protocol for Review of Instructional Materials for ELLs.

The PRIME correlation process identifies how the components of the 2012 Amplification of the English Language Development Standards, Kindergarten through Grade 12, and the Spanish Language Development (SLD) Standards, Kindergarten through Grade 12 are represented in instructional materials. These materials may include core and supplemental texts, websites and software (e.g., apps, computer programs), and other ancillary materials. PRIME is not an evaluative tool that judges the effectiveness of published materials.

Those who complete WIDA PRIME Correlator Trainings receive PRIME Correlator Certification. This may be renewed annually. Contact WCEPS for pricing details at store@wceps.org or 877-272-5593.

New in This Edition

PRIME has been expanded to include
- Correlation to the WIDA Standards Framework
- Connections to English and Spanish Language Development Standards
- Relevance for both U.S. domestic and international audiences

Primary Purposes
- To assist educators in making informed decisions about selecting instructional materials for language education programs
- To inform publishers and correlators on the various components of the WIDA Standards Framework and of their applicability to the development of instructional materials

Primary Audience
- Publishers and correlators responsible for ensuring their instructional materials address language development as defined by the WIDA English and Spanish Language Development Standards
- District administrators, instructional coaches, and teacher educators responsible for selecting instructional materials inclusive of or targeted to language learners

At WIDA, we have a unique perspective on how to conceptualize and use language development standards. We welcome the opportunity to work with both publishers and educators. We hope that in using this inventory, publishers and educators will gain a keener insight into the facets involved in the language development of language learners, both in the U.S. and internationally, as they pertain to products.
Overview of the PRIME Process

PRIME has two parts. In Part 1, you complete an inventory of the materials being reviewed, including information about the publisher, the materials’ intended purpose, and the intended audience.

In Part 2, you answer a series of yes/no questions about the presence of the criteria in the materials. You also provide justification to support your “yes” responses. If additional explanations for “No” answers are relevant to readers’ understanding of the materials, you may also include that in your justification. Part 2 is divided into four steps which correspond to each of the four elements being inventoried; see the following table.

PRIME Part 1: Provide Information about Materials

Provide information about each title being correlated.

Publication Title(s): Lift Off to Literacy

Publisher: Okapi Educational Publishing, Inc.

Materials/Program to be Reviewed: Lift off to Literacy: Using a Shared Reading Approach

Program Overview

Tools of Instruction included in this review: 18 shared books, 18 matching student versions, reading pen, 18 lesson plans, vocabulary starters, Program Overview Guide

Intended Teacher Audiences: Teachers of Pre-K, Transitional Kindergarten, Kindergarten, and 1st Grade

Intended Student Audiences: Appropriate for Pre-K, Transitional Kindergarten, Kindergarten, and 1st Grade students

Language domains addressed in material: listening, speaking, reading, and writing

Check which set of standards will be used in this correlation:

☐ WIDA Spanish Language Development Standards

X WIDA English Language Proficiency Standards

*Please note: This correlation covers the K-12 WIDA ELD Standards Framework PRIME V2 process, not Pre-K or WIDA Early ELD Standards.

WIDA Language Development Standards addressed: (e.g. Language of language arts and social language). Social and Instructional Language, Language of Language Arts, Language of Social Studies, Language of Science

WIDA Language Proficiency Levels included: This program is designed for students learning literacy skills and for language learners yet no explicit alignment to the WIDA Language Proficiency Levels exist in the materials.

Most Recently Published Edition or Website: http://flyingstarttoliteracy.com/lift-off-to-literacy/

In the space below explain the focus or intended use of the materials:
Lift Off to Literacy: Using a Shared Reading Approach will support young students as they develop the attitudes, understandings, skills, and strategies they need to become successful readers.
PRIME Part 2: Correlate Your Materials

1. Asset-Based Philosophy

A. Representation of Student Assets and Contributions

The WIDA Standards Framework is grounded in an asset-based view of students and the resources and experiences they bring to the classroom, which is the basis for WIDA’s Can Do Philosophy.

1) Are the student assets and contributions considered in the materials? Yes No
2) Are the student assets and contributions systematically considered throughout the materials? Yes No

Justification: Provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

1. Students assets and contributions are considered in the materials so that students connect to the texts in each set. Each lesson contains these sections to structure the learning: Introducing the book, First reading of the book, Second reading of the book, Talking about the book, Returning to the book, Vocabulary support, Independent practice. These sections of each lesson plan provide opportunities for activating to prior knowledge, sharing student experiences and connecting those assets to literacy instruction. For example, in the lesson plan for the book, John McBee, the Introducing the book section states the following:

Do you like going to playgrounds? What things do you do at the playground? Who do you go with?

Teachers are encouraged to ask students about what they think will happen with the “John McBee” and the bear, eliciting students’ ideas to connect to the content. In the first reading, the teacher demonstrates appropriate expression while reading and in the Second reading of the text, students are encouraged to fill in rhyming words as they learn the pattern. The question in the Talking about the book section asks students to share their thinking of the story, as follows:

Why did John McBee run away when he first saw the bear?

The Returning to the Book section provides opportunities for students’ assets and contributions be integrated. In this example, the teacher is encouraged to have students take increasing responsibility for reading the text themselves and subsequent activities based on students’ strengths and needs.

2. Students assets and contributions are considered systematically throughout the program. The structure is consistent across reading levels within the entire program. Each set of readers contain a structured lessons with the following sections that contain recommended activities for teachers to help connect the text to students’ experiences, as described in
2. Academic Language

WIDA believes that developing language entails much more than learning words. WIDA organizes academic language into three dimensions: discourse, sentence, and word/phrase dimensions situated in sociocultural contexts. Instructional material developers are encouraged to think of how the design of the materials can reflect academic language as multi-dimensional.

A. Discourse Dimension (e.g., amount, structure, density, organization, cohesion, variety of speech/written text)
1) **Do the materials address language features at the discourse dimension in a consistent manner for all identified proficiency levels?**

   Yes  No

2) **Are the language features at the discourse dimension addressed systematically throughout the materials?**

   Yes  No

**Justification:** Provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

1) The materials address language function features at the discourse dimension in a consistent manner. The discourse dimension is considered in the 18 shared books, across lesson plans for each leveled reader and in the supporting ELL vocabulary books. For example, in the Lesson Plans and texts students have an opportunity to engage in discourse in the *Talking about the book*, *Extending Oral Language*, *ELL vocabulary and the Independent practice* sections of the lesson plan. The support of the reading pen helps students at the discourse dimension in the independent practice section. Please see examples from stories *Hullabaloo and Colors* below:

   **Talking about the book**
   Invite the students to respond to the book and talk about their thinking. Provide time to talk about the book.

   Ask: *What did the green monster do to to make a hullabaloo?*

   **Extending Oral Language**
   Turn to pages 10 and 11. Say: *It says that the monster mother is red faced. What do you think red-faced means?* Draw out that red faced means angry. Ask: *How does this picture help you to know that the mother monster is angry?*

   **ELL support**
   Encourage students to name and talk about colors they know. Support students by talking about the different colored monsters from the book. Use the *Flying Start to Literacy Vocabulary Starter Colors* to talk about colors. Show and talk about the labeled photographs.

   **Independent practice**
   Select students to listen and read along to *Hullabaloo* independently. Provide students with a small book and a reading pen. Encourage students to listen and read along from start to finish and then revisit their favorite pages.

2) **Within the 18 shared books, 18 lesson plans, and in the supporting ELL vocabulary books the language features at the discourse dimension are addressed systematically throughout the materials.** There are varying levels of linguistic complexity including opportunities for varying quantity and variety of oral and written text in communication appropriate for early readers across all 18 shared books, 18 lesson plans, and in the supporting ELL vocabulary books. Please see examples from *stories Squeaky’s BIG Adventure and Places I Go* below:

   **Talking about the book**
Invite the students to respond to the book and talk about their thinking. Provide time to talk about the book. 
Ask: Why did Squeaky want to leave her cage?

**Extending Oral Language**
Say: Let’s all read the refrain together. 
Hurry, hurry, dart and dash
Scurry, scurry, quick as a flash!

Ask: What are we asking Squeaky to do? Draw out that the message is to encourage Squeaky to run as fast as she can. Talk about the meaning of the words in the refrain. Say: Hurry means to run fast. Scurry means to move fast using lots of short little steps. Invite students to show how they might hurry and scurry.

**ELL support**
Encourage students to name and talk about places they might go. Support students by talking about the things you might see at each place in the book. For example, say: There are animals on farms. Some farms have cows and horses. What other animals might you see on a farm? Use the Flying Start to Literacy Vocabulary Starter Places I Go to discuss different places. Show and talk about the labeled photographs.

**Independent practice**
Select students to listen and read along to Squeaky’s BIG Adventure independently. Provide students with a small book and a reading pen. Encourage students to listen and read along from start to finish and then revisit their favorite pages.

---

**B. Sentence Dimension (e.g., types, variety of grammatical structures, formulaic and idiomatic expressions; conventions)**

1) **Do the materials address language features at the sentence dimension for all of the identified proficiency levels?**

   Yes  No

2) **Are the language features at the sentence dimension appropriate for the identified proficiency levels?**

   Yes  No

3) **Are the language features at the sentence dimension addressed systematically throughout the materials?**

   Yes  No

**Justification:** Provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.
1. The materials address the language features at the sentence dimension for all of the identified proficiency levels. The sentence dimension is considered in the 18 titles and across lesson plans for each book and corresponding vocabulary support. For example, in the lesson for Grandma's Favorite Things, the fiction text itself reflects sentence level features that fits the readers needs at this reading level. Examples include types and a variety of grammatical constructions, fluency of expression, mechanics of sentence types, matching language forms to purposes and perspectives. The other fiction texts at other levels do the same. Within the lesson plan opportunities for engaging with the sentence dimension exist in the following:

Introducing the book

Point to each word as you say it to demonstrate one-to-one correspondence between the written and spoken word. Point out the name of the author and the illustrator. Say: The author wrote the words and the illustrator drew the pictures. This book is about going shopping. Do you like going shopping? What things do you like to buy? Discuss students’ responses.

2. Within the 18 titles and corresponding lesson plans the there are examples of language features at the sentence dimension that are appropriate for early readers. There are varying levels of language forms and conventions across the texts. Within the lesson plans there are systematic opportunities for students to use different language forms and conventions. For example, in the lesson for Grandma’s Favorite Things, the text reflect a sentence level dimension in that it fits the readers needs at this level by having a variety of types and a varieties of grammatical constructions, fluency of expressions, mechanics of sentence types, matching language forms to purposes and perspectives, including dialogue as follows:

p. 6:

“Now what?” said Grandpa.

“Will we get blueberries, blackberries, or big blue plums?”

p. 7:

“No,” I said.

“Let’s get bannans and a big bunch of grapes!”

3. Within the 18 titles and corresponding lesson plans the language features at the sentence dimension are addressed systematically throughout the materials. Within the lesson plans there are systematic opportunities for students to use language at the sentence level. For example, in the lesson for Grandma’s Favorite Things, opportunities for the sentence dimension exist in the following:
Vocabulary support

Encourage the students to name and talk about the foods in the book. For example, say: Pepperoni is a type of meat that some people have on pizza. It is spicy! Pickles are a green vegetable. Use the Flying Start to Literacy Vocabulary Starter Shopping to discuss other food. Show and talk about the labeled photographs.

C. Word/Phrase Dimension (multiple meanings of words, general, specific, and technical language)

1) Do the materials address language features at the word/phrase dimension in a consistent manner for all identified proficiency levels? Yes No

2) Are words, expressions, and phrases represented in context? Yes No

3) Is the general, specific, and technical language appropriate for the targeted proficiency levels? Yes No

4) Is the general, specific, and technical language systematically presented throughout the materials? Yes No

Justification: Provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

1. The materials address language features at the word/phrase level dimension in a consistent manner throughout the program. Each lesson plan contains a component of vocabulary support through its corresponding Vocabulary support book and recommended

1

2General language refers to words or expressions not typically associated with a specific content areas (e.g., describe a book).
Specific language refers to words or expressions used across multiple academic content areas in school (chart, total, individual).
Technical language refers to the most precise words or expressions associated with topics within academic content areas in school and is reflective of age and developmental milestones.
activities. For example, in the lesson for *My Dog Rags*, the Vocabulary starter book **Doing Things** teaches the key vocabulary -drink, dig, jump, eat, swim, sleep, run- through several activities.

2. Words, expressions, and phrases are represented in context. In the **Doing Things** Vocabulary starter book, the following activities promote context-based learning at the word/phrase dimension:

**Developing oral vocabulary**

Getting started - to use words in context cooperatively

Word webs - to work in pairs to make connections between words

Word families - to build word lists

Mystery word - to guess words based on meaning

3. The general, specific, and technical language is appropriate for early readers. The language presented is appropriate for the reading level identified in the program. For example, see the below activities below for *My Dog Rags*:

**Developing reading vocabulary**

Getting started - to analyze word shape, number of letters, sounds

First letters - to mask key vocabulary words on starter and self-check

Word and picture match - to match words to pictures

Word groups - to sort word cards into semantic groups

4. The general, specific, and technical language is systematically presented throughout the materials and in context. As stated above, the Vocabulary support book includes activities for using various tiers of vocabulary in literacy-based activities. For example, in *My Dog Rags*:

**Developing writing vocabulary**

Writing sentences - to use words in writing complete sentences

Spelling - to analyze and apply beginning, middle and ending sounds to form words and play word recognition games
3. Performance Definitions
The WIDA Performance Definitions define the WIDA levels of language proficiency in terms of the three dimensions of academic language described above (discourse, sentence, word/phrase) and across six levels of language development.

A. Representation of Levels of Language Proficiency

1) **Do the materials differentiate between the language proficiency levels?**
   - Yes
   - No
2) **Is differentiation of language proficiency developmentally and linguistically appropriate for the designated language levels?**
   - Yes
   - No
3) **Is differentiation of language systematically addressed throughout the materials?**
   - Yes
   - No

**Justification:** Provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

1. The program, as stated in the Program Overview below and on the website, provides effective support for early readers. Yet the materials do not differentiate between language proficiency levels.

2. As stated above, the materials do not differentiate between language proficiency levels.

3. The differentiation of language is systematically addressed throughout the materials although there are no identified levels of language proficiency in the program. Through this guided reading set of instructional materials, instructions for teachers are present that give ideas to differentiate when students are reading, writing, listening and speaking. Examples of language differentiation supports found throughout lesson plans at each level are graphic organizers, partners, group work, modeled writing, repetition, visuals, and captions. In *My Dog Rags*, differentiation supports include peer support through grouping, discussion and games. It also includes the reading pen and pointers as a support, visuals in the materials and text, sentence starters and vocabulary frames, and the use of annotating text by putting circles around key words and sounds.
B. Representation of Language Domains
WIDA defines language through expressive (speaking and writing) and receptive (reading and listening) domains situated in various sociocultural contexts.

1) **Are the language domains (listening, speaking, reading, and writing) targeted in the materials?**
   - Yes
   - No

2) **Are the targeted language domains presented within the context of language proficiency levels?**
   - Yes
   - No

3) **Are the targeted language domains systematically integrated throughout the materials?**
   - Yes
   - No

*Justification: Provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.*

1. The language domains of listening, speaking, reading and writing are targeted in the materials. Throughout each lesson, students have the opportunity to engage in activities across all of the language domains.

   For example, in the text *The Road*, these are the some of the activities they engage in for each domain:

**Listening and Reading:**

- Independent practice: Select students to listen and read along to *The Road*. Provide students with a small book and a reading pen. Encourage students to read the book from start to finish and the revisit their favorite pages.

**Speaking:**

- Talking about the Book Section: Invite students to respond to the book and to talk about their thinking.

**Writing - Modeled**

- Draw a picture of one of the vehicles from *The Road*. Say: *I have drawn a picture of a bulldozer. Now I will write a sentence about it.*
  Model writing the sentence: *This is a bulldozer*. Talk aloud as you write. For example, say:

  Now, *I need to write the word bulldozer*. *It is a long word and I can hear the /b/ sound at the beginning so I will start by writing the letter “b.”*
Have the students choose a machine from the book to draw. They could use your modeled writing to support them as they write a sentence about their drawing.

2. The targeted language domains are present within the early emergent stages of reading but not within targeted language proficiency levels. The program, as previously stated in the Program Overview below and on the website, provides effective support for ELL students. Yet the materials do not differentiate between language proficiency levels.

3. Language domains are systematically integrated throughout the materials. Each lesson plan has the following in each section, the domains are integrated through targeted activities as discussed above--Introducing the book, First reading of the book, Second reading of the book, Returning to the book, ELL support, and Independent practice. Many sections integrate all domains while some solely focus on one domain. For example, Introducing the book consistently integrates speaking and listening, while Independent practice mainly focuses on reading and listening. Another example is the section Writing - Modeled where students have an opportunity to write with a guided approach.
4. The Strands of Model Performance Indicators and the Standards Matrices

The Strands of Model Performance Indicators (MPIs) provide sample representations of how language is processed or produced within particular disciplines and learning contexts. WIDA has five language development standards representing language in the following areas: Social and Instructional Language, The Language of Language Arts, The Language of Mathematics, The Language of Science, The Language of Social Studies as well as complementary strands including The Language of Music and Performing Arts, The Language of Humanities, The Language of Visual Arts.

The Standards Matrices are organized by standard, grade level, and domain (Listening, Speaking, Reading, and Writing). The standards matrices make an explicit connection to state academic content standards and include an example for language use. Each MPI includes a uniform cognitive function (adopted from Bloom’s taxonomy) which represents how educators can maintain the cognitive demand of an activity while differentiating for language. Each MPI provides examples of what students can reasonably be expected to do with language using various supports.

A. Connection to State Content Standards and WIDA Language Development Standards

1) Do the materials connect the language development standards to the state academic content standards? Yes  No

2) Are the academic content standards systematically represented throughout the materials? Yes  No

3) Are social and instructional language and one or more of the remaining WIDA Standards present in the materials? Yes  No

Justification: Provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

1) The materials connect the language development standards to the common core state academic standards. Lift Off to Literacy provides the Common Core State Standards with each text set and lesson including for Reading, Writing, Speaking and Listening, and Language. In addition, lessons within Lift Off to Literacy connect to at least one of the WIDA Language Development Standards (Social and Instructional Language, Language of Language Arts, Language of Social Studies, Language of Science). Many of the Lift Off to Literacy learning opportunities address multiple Language Development Standards. For example in the set Living Things: the books and lesson plan, What Lives Here and Mini Beasts the language of science and language arts are addressed, along with social and instructional language. In the text students have an opportunity to learn about different animals that live in a garden and about what these animals eat. The students are supported with garden animal vocabulary in the vocabulary starter, Mini Beasts. The state academic standards that are addressed are; K.RI.5 With prompting and support, describe the relationship between illustrations and the text in which they appear, K.RF.1c Understand that words are separated by spaces in print, K.W.2 Use a combination of drawing, dictating, and writing to compose
informative/explanatory texts in which they name and what they are writing about and supply information about the topic, K.SL.4 Describe familiar people, places, things, and events and, with prompting and support, provide additional detail, K.L.1d Understand and use question words.

http://flyingstarttoliteracy.com/teacher-resources-lift-off-literacy/

2) The academic content standards in Lift Off to Literacy are systematically represented throughout the materials. Within each set of lesson plans and books there is a correlation chart to show each lesson is in alignment to the Common Core State Standards. This is done for all 18 lessons included in the program. Different standards are displayed depending on what the lesson covers.

3) Social and instructional language and one or more of the WIDA standards is present in Lift Off to Literacy. The language of language arts, science, math and social studies are included within the three topic sets including, My Family and Me, In the World, and Living Things. The set, In the World the six stories include the language of social studies, math, and science while the lesson plans include opportunities for the language of language arts. The set, Living Things the six stories include the language of science and opportunities in the lesson plans for the language of language arts. All stories include social and instructional language.
Please see below for examples of the language of science, language arts, and social and instructional language from the set of Living Things in the story, *What do Animals Do at the Zoo*.

**Introducing the book**

Ask: *What animals do you like to see at the zoo?* Provide time to listen to the students’ responses and talk about them.

Talk about the things that the zoo animals in this book do, the features they have, and the food they eat. For example, say: *Some of you said that you like to see lions at the zoo. Lions can roar. What else do they do? What do they eat?* Discuss students responses.

Show students the front cover of the shared of the book, *What do animals at the zoo?* Say: *This book will tell us about animals at a zoo and the things they do there.*

---

**B. Cognitive Challenge for All Learners at All Levels of Language Proficiency**

1) **Do materials present an opportunity for language learners to engage in various cognitive functions (higher order thinking skills from Bloom’s taxonomy) regardless of their language level?**

2) **Are opportunities for engaging in higher order thinking systematically addressed in the materials?**

**Justification:** Provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

1. The materials present an opportunity for language learners to engage in various cognitive functions regardless of their language levels. In each lesson, students interact in structured activities using various cognitive functions, most clearly evident in the following structure used in the section Talking about the Book. See example below from *Into the Tent*.

   - **Inferential:** *Why did the text collapse?*
   - **Synthesizing:** *Who do you think made the text go SNAP?* If the students say it was the cat, ask: *Was it really just the cat that made the tent collapse?*
   - **Critical:** *Would you have liked to sleep in this tent? Why or why not?*

2. Opportunities for engaging in higher order thinking are addressed systematically throughout the materials. The sections of each lesson provide activities for students to read,

---
write, listen and speak using various cognitive functions. For example in the texts used in this example, *Into the Tent*, students use these cognitive functions: identify, tell, react, recognize, imagine, and support answers with evidence from the text.

### C. Supports for Various Levels of Language Proficiency

1. Do the materials provide scaffolding supports for students to advance within a proficiency level?  
   - Yes  
   - No

2. Do the materials provide scaffolding supports for students to progress from one proficiency level to the next?  
   - Yes  
   - No

3. Are scaffolding supports presented systematically throughout the materials?  
   - Yes  
   - No

*Justification: Provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.*

1. These materials not explicitly differentiate between language proficiency levels although the program, as previously stated in the Program Overview below and on the website, provides effective support for ELL students. Yet the lesson plans provide scaffolding supports for students that may advance them within a language proficiency level. Examples of language differentiation supports found throughout lesson plans at each level are partners, group work, modeled writing, rhyme, rhythm repetition, visuals, reading pen, and vocabulary support.

2. Again, the materials do not explicitly differentiate between language proficiency levels yet the lesson plans provide scaffolding support that may progress students from one proficiency level to the next. In this lesson plan from the book, *What a Mess*, examples of the following supports are:

   - vocabulary starter, peer discussion, lists of keywords, shared reading of text, pictures, word webs word banks, word lists, sentence starter (*I like to ......*), text with visuals and pictures, guided questions, checking for comprehension questions (i.e. *Which activity would you like to do the most?*) with support from the photographs and text in the book, rereading and
repeating language in the book, act out the story with classmates, and modeled writing

D. Accessibility to Grade Level Content

1) **Is linguistically and developmentally appropriate grade-level content present in the materials?**
   Yes  No

2) **Is grade-level content accessible for the targeted levels of language proficiency?**
   Yes  No

3) **Is the grade-level content systematically presented throughout the materials?**
   Yes  No

*Justification: Provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.*

1) Lift Off to Literacy is linguistically and developmentally appropriate grade-level content for grades PK - 1st grades in reading levels A-B. There are 18 titles, 18 vocabulary starters, and a reading pen included in this curriculum. Lift Off to Literacy provides designated literacy instruction and English language development to help students successfully access the core content in primary instruction. Lift Off to Literacy is centered around non-fiction and fiction texts separated into three sets. The sets include My Family and Me, In the World, and Living Things with lesson plans that include vocabulary building opportunities, Introducing the book, First reading of the book, Second reading of the book, Talking about the book, Returning to the book that focuses on Phonemic awareness, Phonics, Extending oral language, Fluency, Print concepts and Modeled writing. Each lesson also includes ELL support, Independent practice and a blackline masters which supports early emergent readers with a writing activity. The subject matter
that is presented in Lift Off to Literacy is of high interest for grades PK, K5, and 1st grade early emergent readers.

2) Lift Off to Literacy gives opportunities to ELLs to access grade-level content and also promote English proficiency development as they learn at the early emergent stage. A variety of supports are present in the curriculum to provide instruction to support all levels of English language proficiency. Supports allow teacher flexibility in order to address different learning needs. There is a designated ELL support section that gives teachers ideas in how to scaffold instruction for their learners. Each lesson also includes and opportunity for students to listen to the book using the reading pen. Each lesson also is accompanied with a vocabulary starter book that support the core text. For example in the lesson plan for the text *In the Fairy Tale Woods* there is a vocabulary starter book that uses position and directional words. Within this book there are opportunities to develop oral, reading, and writing vocabulary. Please see below for an example of an activity that is suggested to develop oral vocabulary.

Rally Race
Have students work with a partner to set up a simple obstacle course for a toy car using small boxes, and books with blocks under one end for ramps. have students take turns to give instructions for how and where the car should go to complete the course. For example: *take the car up the ramp, over the yellow box, and around the green box.*
In Lift Off to Literacy the grade level content is systematically presented throughout the materials. All 18 titles, vocabulary starters, 18 lesson plans and the use of reading pen follow the same structure. The program includes early emergent reading levels A-B.

Each lesson plan includes an overview that links the Common Core State Standards addressed in the lesson, vocabulary, Key concepts, an introducing the book, First reading of the book, Second reading of the book, Talking about the book, Returning to the book, ELL support, Independent practice and an opportunity to write with the support of the Activity card.

E. Strands of Model Performance Indicators

1) **Do materials include a range of language functions?**
- Yes
- No

2) **Are the language functions incorporated into a communicative goal or activity?**
- Yes
- No

3) **Do the language functions support the progression of language development?**
- Yes
- No

*Justification: Provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.*

1) Lift Off to Literacy includes a range of language functions. Within the 18 lesson plans students have an opportunity to:
- retell stories
- distinguish shades of meaning
- use temporal words and phrases
- report on topics
- compare and contrast
- explain
- ask and answer questions
- sequence
- discuss
In Lift Off to Literacy there is an opportunity for language functions to be used in a communicative goal or activity in the writing and sharing and presenting of the lesson plan. See examples below:

**Introducing the book** - students are asked questions to build background knowledge
**Talking about the book** - students are invited to respond to the book and talk about their thinking
**Extending oral language** - students use the newly learned vocabulary to extend their thinking
**Writing Modeled** - students use the teacher’s modeled writing to help support their own writing
**ELL support** - student use new vocabulary to help build a list of other familiar vocabulary words

3) Language functions are presented throughout the lessons. Language functions are found within common core standards and are grade level appropriate for each of the reading levels.
